Specifics:

Prior to beginning this or any exercise program or doing any physiological testing procedures it is required that you consult with, and are released by, your physician to do so.

All the workouts read as follows: The first number is always the total workout time so 2/zone 1, 2/5 x 5 min zone 4 w/ 3 off means the ride is 2 hours with a base pace of zone 1, 2 and within that ride you will do 5 intervals of 5 minutes each in heart rate zone 4 with 3 min rest between each interval. The intervals will always read the number of intervals x the amount of time for each w/ some amount of off time. Everything reads the same including hill repeats, drills, etc.

You will notice the HR training zones 1 through 5. If you do not have HR training zones you can use perceived effort to gauge output. Option #1-Let Easy represent zone 1, 2, Moderate represent zone 3, Moderate/Hard represent zone 4, and Hard represent zone 5. Option #2-You can relate these zones to Max HR but you have to know your max in order to do so. If you know your max you can relate zone 1 to 50-60% of max HR, zone 2 60-70% of max HR, zone 3 70-80% max HR, zone 4 80-90% max HR, and zone 5 90-100% of max HR

Option for calculating Max HR- 220 minus age or $(205 - (.5 \times \text{your age})) = \text{Max HR}$ although these may or may not be accurate but they are easy and safe.

Option #2 for calculating Max HR-The highest HR you have ever seen (in recent years and on the bike).

Option #3 for calculating Max HR-Perform a ramp test on a trainer or on a progressive climb. Continue to increase the intensity over a 10-12 min period of time and sprint all out the last 30-40 sec and note HR.

Option #4 for calculating Max HR-Perform two 2 mile all out time trials on flat to 2% uphill terrain and average the HR's

Option #5 for calculating Max HR-Find a 3-5% uphill grade and continue to increase your intensity over a 10 min period of time. Near the end stand up and sprint all out and note HR.

None of these methods are perfect. They all have countless variables. It is best to have an experienced coach or lab perform some basic physiological testing to determine either Max or Anaerobic Threshold HR's. It is simply more accurate and safer.

Pyramid Coaching can be reached at 603-4874 or www.pyramidcoaching.com if you are interested in having an Anaerobic Threshold Test done and accurate HR Training Zones established.

Details are everything in cycling. Make sure you are taking care of recovery along the way. This includes sleep, hydration, nutrition, rest, low stress, and proper on the bike and post workout supplementation.

Review portions of the course especially the river crossings so you are familiar with the upcoming terrain and obstacles.

The hours are flexible and if you have any additional time to devote to riding take advantage of it. It will only serve to contribute

to your aerobic base, economy, and endurance. Just make sure any additional volume you do is easy to moderate pace only. Understand that these schedules are written in general and given a perfect situation. Not everyone is the same. Some respond to workloads and intensity very differently. You will have to be objective with yourself and take into account these are guidelines and may very well have to be adjusted and adapted to your specific training situation. Life happens. Take into account stress and recovery. Stress is stress no matter if it's physical, mental, emotional, etc., and it needs to be dealt with accordingly. If stress increases in one area it HAS to be reduced in another. To make gains you have to recover and make the adaptations. You can't be in the hole all the time and make progress. Just some things to consider.

Group rides are a critical component to success in this event. You will be surrounded by riders most of the time and you want to be safe, aware, comfortable, and not cause any harm to yourself or others. Aside from that, group rides will push you outside of your comfort zone and force you to answer the pace changes much like you will experience in the event. It is also a great opportunity to work on which nutritional and hydration products work well in your system.

Mostly just have fun and enjoy the journey!!!

Good luck!
